

# SUSHANT LOKHANDE

San Jose, CA | +1 669-340-6655 | [lokhandesushant014@gmail.com](mailto:lokhandesushant014@gmail.com) | [sushantlokhande.me](https://sushantlokhande.me) | [linkedin.com/in/sushantlokhande14](https://linkedin.com/in/sushantlokhande14) | [github.com/sushantlokhande14](https://github.com/sushantlokhande14)

## EXPERIENCE

**San Jose State University** | Graduate Research Assistant, Applied AI Systems Aug 2025 to May 2026

- Built an automated evaluation harness for controlled experiments, cutting setup effort **55%** and making every result reproducible from a single config.
- Boosted malware classification to **80.2%** across 17 families with a soft-voting **PyTorch** ensemble (CNN, ResNet50, ViT), **2.4 pts** over the best single model at  $p < 0.001$ .
- Validated **14 interoperability scenarios** across networking, dependency, and **failure-recovery** paths to confirm recovery behavior before large experiment runs.
- Mentored **200+ students** across **3** courses (Programming Paradigms, AI, ML) through debugging sessions, code reviews, and grading.

**Turito** | Software Engineering Intern, Customer-Facing Real-Time Platform Jun 2022 to Oct 2022

- Cut controlled-disruption failures **42%** (3.1% to 1.8%) by hardening **retries**, timeouts, failure recovery, and distributed state transitions.
- Reduced production diagnosis time **35%** by adding structured **metrics**, runtime-state visibility, and targeted logs.
- Slashed p95 CPU **22%** by profiling high-frequency media paths and eliminating excess buffer allocation, payload copies, repeated routing lookups, and **lock contention**.
- Debugged **ICE/STUN/TURN** connection setup and degraded-network recovery across a **WebRTC** control plane and **RTP/RTCP** media paths spanning about **12 regions**.

**Trivia Softwares** | Software Engineering Intern Nov 2021 to Jan 2022

- Cut performance-investigation time about **40%** by building tooling on Rust workers, **Python** aggregation, **SQLite**, Flask, and Chart.js.
- Built a **Rust/Tokio** load-testing framework driving about **25,000** concurrent sessions, exposing lock contention, serialized **WebSocket** writes, and slow session cleanup.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, Java, SQL

**Agentic AI:** agent evaluation, tool use, RAG, LLM routing, OpenAI and Anthropic APIs, LangChain, Claude Code

**Graphs & Data:** Neo4j, Cypher, PostgreSQL, MongoDB, Redis, Qdrant

**Shipping:** FastAPI, React, Next.js, Docker, AWS, Temporal, pytest

## PROJECTS

**Teller, Agent Evaluation Environment** | *Browser agents, Claude Code, Python, TypeScript*

- Analyzed **14** computer-use agent runs against an adversarial app (nested frames, missing test IDs, session expiry), classifying each failure as planning, execution, validation, or recovery.
- Ported the same workflows to a second tenant with a **16-line** overlay and zero re-recording by designing a reusable capability layer.

**Graph Connect, Graph-Backed Platform** | *FastAPI, Neo4j, MongoDB, React, Docker, AWS*

- Modeled **50,000+** relationships in **Neo4j** with two-hop Cypher recommendations and load-tested APIs with Locust at about **1,200** users against sub-300 ms targets.

**Kairo, Voice and Chat Assistant** | *React, TypeScript, FastAPI, OpenAI, Vapi, AWS*

- Shipped a chat and voice assistant with LLM routing and call handoff in **under one week**.

## OPEN SOURCE

- **NVIDIA/garak**: preserved attempt UUIDs in report aggregation for traceable LLM evals (merged, shipped in v0.17.0)
- **microsoft/markitdown**: fixed EPUB conversion for percent-encoded manifest paths, with regression tests (merged)

## EDUCATION

**San Jose State University** | M.S. in Computer Science | GPA 3.8/4.0 | Spartan Scholar Aug 2024 to May 2026

*Coursework:* Artificial Intelligence, Machine Learning, NoSQL, Database Systems, Distributed Computing, Advanced Algorithms

**University of Mumbai** | B.Tech. in Computer Engineering | GPA 3.9/4.0 Jun 2019 to May 2023

*Research:* malware image-classification ensemble selected for Dr. Mark Stamp's ML textbook; sole-author contactless palmprint verification (0.9975 AUC)
